PRODUCT **RELEASE – ON® CHISEL PASTE**

RELEASE – ON® CHISEL PASTE is formulated to lubricate and withstand high temperature to prevent seizure and premature wear of thread – in / plug – in tools and also wearing bushes used in pneumatic. Hydraulic hammers. It forms an anti-seizing film on the surface and prevents these from normal or fretting corrosion.

BENEFITS:

Ideal lubricant for threaded connections and also wearing bushes, which are exposed to vibratory loads.

Avoids seizing threaded connections especially shoulder joints.

Equipped with special additives and solid lubricants such as **Nano-copper (24% by weight) and Synthetic graphite(8% by weight).**

Specifically designed for those applications which are exposed to load and temperature.

Forms a lubricating layer whereby physical separation of surfaces are achieved which actively helps prevent seizure and wear.

PHYCIAL CHARACTERS

TEMPERATURE	:	- 20 ^{O} C to +1100 ^{O} C
APPEARANCE	:	Copper brown colored paste
Worked Penetration	:	310-320, 0.1 mm at + 25 ^{O} C
Resistance to water	:	1 – 90
